NEUF

**Marque :** Army Painter

**Référence :** GF9GM1001P

**Prix :** 99.95 €

### **Descriptif :**

Etat : NEUF EN BOITE    Endless hours of adventure await you!

Whether you descend into murky caverns or tread the pass of ancient Dwarf mines - the **GAMEMASTER: Dungeons & Caverns Core Set** allows you to create any setting for your roleplaying party.

Both fun and extremely easy to build, this set has absolutely **EVERYTHING** you need to build any subterranean setting - for any RPG system or skirmish miniature game.

Armed with specially manufactured XPS foam board and a versatile hot wire cutter, go crazy and don't let anything but your imagination hold you back! Find inspiration in our many online tutorial videos, or the inspirational guide included in this set, to conjure up any dungeon or cavern complex you might want. Make it generic and reuse it countless times in different patterns to create overwhelming cave systems - or make that highly unique Lair of the Silver Dragon or the Frozen Cave of the Owlbear - anything is possible!

The scenery XPS foam board will also allow you to make doorways, cave entrances, stairs, bridges, slime pits and many more features. The soft surface of the board allows you to draw any texture or image, enhancing your gaming experience and blowing the minds of your fellow dungeoneers.

Do it yourself or with your party - once you cut and create your first magic portal, you'll never look back!

**GAMEMASTER - In Search Of Adventure!**
