The Character Expansion Pack 1 has character cards with new art, a starting deck for each character that includes one new piece of art per deck, and a full set of upgrade stickers. With this pack, players can branch out, creating whatever shadowrunner concept comes to mind, starting them on the path to being a legend. Or they can bring new players into the game, sending them on the path to

designing their own character and discovering the story the mean streets are waiting to tell.
