The twisted geniuses behind the first Munchkin Monster Manual are back! The Munchkin Monster Manual 2.5 contains 3,905 monsters -- of which only 3,872 are orcs -- including such fell nasties as Auntie Paladin, the Misplacer Beast, and the dreaded Thing With a Name So Long There's No Room for a Picture in the Book. It also includes new monster templates, guidelines for updating your Munchkin campaigns to the 2.5 rules, and the wit for which the Munchkin RPG has become (in)famous.

More creatures to slay . . . more treasure to plunder . . . more levels to gain . . . the Munchkin Monster Manual 2.5 has it all!
