Javier Zamora used to be a real journalist, with all the perks of working for NBN. Now, he vids scandalous, fringe, and downright disgusting content for a less mainstream corner of the Net. His stories draw an audience, at least enough of one to fund his life in the undercity. Or they used to, anyway.

When Zamora stumbles on evidence of a serial killer stalking the undercity, he thinks it might be his ticket back to journalistic respect—or at least a steady revenue stream. But as the investigation draws him into a sordid world of underground cage fights and blackmail scams, the notorious Los Scorpiones gang warns him to drop the story.

Faced with the choice between abandoning the story of his career or antagonizing a dangerous criminal cartel, Zamora must tread carefully if he wants to keep his creds, his life, and maybe even his integrity.

Enter a world of crime with Undercity: A Javier Zamora Novella by Richard Lee Byers! This page-turning adventure explores the dark center of the Android Universe, as Javier Zamora risks life-and-limb to find the perfect story!
