Etat : NEUF

Angels & Demons When an unprecedented cosmic storm engulfs a world of peaceful scientists, the inhabitants are transformed by the planar energies to become either the best of worst versions of themselves. The crew of Nakonechkin Slavage are the only ones close enough to stop an army of demons besieging the capital city, but this mission is personal: one of their own was planetside when the storm hit! In addition to a rollicking adventure, this book includes four pregenerated characters that are ready to play, with full stat blocks and backstories. The inside front cover includes all of the maps needed for this adventure. Skitter Warp is written for the popular Starfinder Roleplaying Game. It's intended for 5th level characters who are ready to lend some

helping hands to friends in crisis.
