The Durani are the old power of the world, and their empire has spanned a thousand years unbroken.

Arcanum Durani animates Golems carved from stone and forged from precious metal by tapping the Mana trapped within huge gems found only in the Durani homeland. Atop these glittering behemoths, the Durani war masters of old spread out, conquered, and solidified the borders of their Empire. They built roads, towers, and castles to fortify their captured territories.

The staid resilience of the Durani Golems renders them incredibly resistant to damage and their ranged powers make them ideal for siege warfare.
